

ALUMINIUM COMPOSITE PANEL

INFINITELY ADAPTABLE SIGN AND DECORATIVE PANEL

Versatile Sign & Decoration Panel

Nubond aluminium composite sheet stands as a flexible signage and decoration panel celebrated for its excellence and endurance, catering to diverse applications. Aluminium Composite Panel (ACP) is a popular choice in signage due to its durability, rigidity, and versatility. It consists of a solid aluminium top layer, a polyethylene (PE) sheet in the core, and a solid aluminium bottom layer. With a flat painted surface on one side, it offers cost-effective signage solutions without compromising on quality. ACP is sturdy and resistant to breakage, allowing for v-grooving and bending at a 90-degree angle. Despite its thin profile, it maintains rigidity, making it ideal for various signage applications.

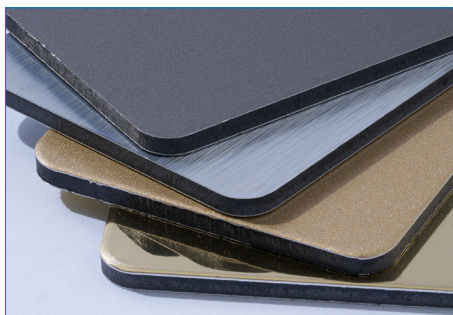

Common Applications

- Interior & Exterior Signage
- Shop Fitting
- Cabinet Making
- Point of Sale/Purchase
- Tradeshow/Exhibition Stands & Signage

- Partitioning
- Screen Printing
- Canopies

Unique Features:

- Weather and corrosion resistance
- Lightweight
- Exceptional flatness and surface finish deal for applying graphics and vinyls
- Suitable for printing applications with a high-quality paint finish
- Optimised for outdoor use with added UV protection
